FUND PERFORMANCE

The **Investors Mutual Private Portfolio Fund** generated a return of +1.8% in March, while the Australian market recovered from earlier losses to continue its growth-led rally. Investor sentiment remained positive with expectations of an economic soft landing coupled with interest rate cuts later in the year.

Within the **Relative Value** strategy, our Real Estate and Energy holdings including Mirvac and Santos performed well, while our Communications and Consumer Discretionary stocks such as Telstra and Collins Foods lagged the market rally. During the month, we accumulated shares in sound companies at reasonable prices, including ResMed and Viva Energy.

In the **Events** strategy, we subscribed successfully to a few capital raising transactions such as Clarity Pharmaceuticals and Magnetic Resources. In M&A, we benefited from the increased revised offer for Pacific Smiles from Genesis Capital, and Superloop's broadband internet contract win with Origin Energy.

The Fund earned good dividend **Income** from many of its core investments over the month. In addition, we used the market swings in March to earn supplementary option premium around some of our holdings including APA, Medibank and Woodside Energy.

As always, we maintain our conservative positioning in what we believe are good quality companies with relatively sustainable earnings and dividend yields, in conjunction with a market risk management overlay to reduce downside participation. At the same time, we remain alert to any emerging opportunities.
